South Carolina Public Service Commission

Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

Sincerely,

Dawn Bickett

**Subject:** Duke Energy increasing rates

Dear Public Service Commission,

I am very worried about the rate hike that Duke Energy is asking for in the coming year. I urge you to reject their request, because none of the executives that run it look like they particularly need more people's money in their pockets. Your job is to protect the people of South Carolina by giving them reasonable utility rates.

Please show Duke that you are willing to do your job and act on the behalf of South Carolinians.

Thank you,  
Dawn Bickett
